

## Prefilter Holding Frames

### Description:

Re-useable prefiler holding frames accept media pads or pleated media packs which self-seal to the holding frame when installed. Frames are formed of 20 gauge steel and spot welded at the corners. A gate is installed to retain the media during operation and swings out to the side for easy media replacement. Notches are punched in the flanges of the frame to allow clearance for the retainer clip on the final filter and maintain the vertical location of the holding frame during installation.

Nominal Sizes:	Access Side	Frame Material	Part Number Frame Only
24" x 24" x 4"	Upstream	Galvanized Steel	S52258-C1
24" x 24" x 4"	Downstream	Galvanized Steel	S52280-C1
24" x 24" x 2"	Upstream	Galvanized Steel	S52258-C3
24" x 24" x 2"	Downstream	Galvanized Steel	S52280-C3
24" x 24" x 4"	Upstream	Stainless Steel	S52258-C2
24" x 24" x 4"	Downstream	Stainless steel	S52280-C2
24" x 24" x 2"	Upstream	Stainless steel	S52258-C4
24" x 24" x 2"	Downstream	Stainless steel	S52280-C4
